Editorial

IS DEMOCRACY SLIPPING AT APPOMATTOX?

No county in Virginia can boast of a finer Democratic tradition than Appomattox. The entire town advantage of the occasion to have parties, balls and other social events for the benefit of a cause dear

to our President. Every city and virtually every community vied in honoring "F. D." But Appomattox went on with its routine and missed a grand chance to celebrate.

DIDN'T TELL US!

When George C. Perry was campaigning for the governorship, he didn't tell us about all these tax boosts he is now proposing.

Free Action for all 4 wheels
plus the safety of a front axle and comfort of Cantilever Springs

A great deal of thought is being given today to safety. Various experiments are being tried in an effort to get independent action for an automobile's front wheels.
All of which is simply another tribute to the soundness of Ford engineering and the Ford free action not only for the front wheels—but for all 4 wheels.
Ford transverse cantilever springs provide individual suspension for both front and rear axles. In the new Ford these springs have been made more flexible. This type of construction is not experimental and has the advantage of

comfort plus the proved safety of a front axle. This new Ford combines V-8 power with gas-oil economy—20 miles to the gallon at a speed of 45 miles per hour, in exhaustive road runs. It will do 80 miles an hour without difficulty. At 50 or 60 miles per hour it is actually running at ease!
This reserve power means acceleration unequalled by practically any other make of American automobile, regardless of cost. Before you buy any car at any price, drive the new Ford V-8 for 1934.
